

## REVO IPA-150

### PRODUCT DESCRIPTION

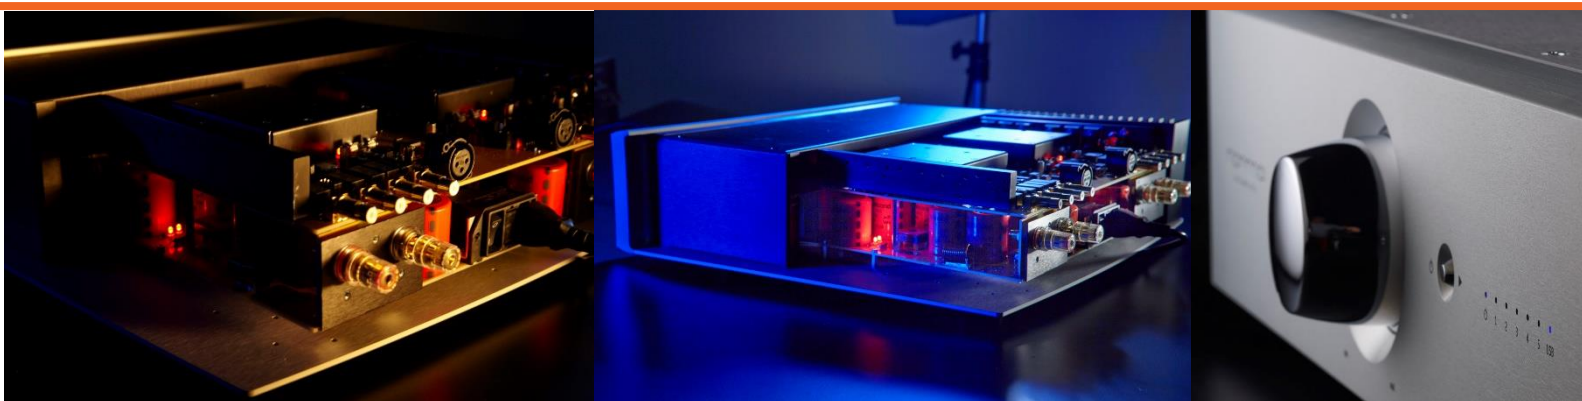

The characteristics of the REVO PA-150 make it an extremely versatile amplifier. The high power (150W / 80hm), the ability to drive even the most difficult speakers and the sound characteristics, make it a unique device. Power, dynamics, speed, transparency are combined with an absolute lack of listening fatigue and a marked musicality.

These features make it an ideal match with the REVO SC-2 preamplifier, which expresses the same sonic personality. But, even if you want to combine it with other preamps, the REVO PA-150 will become a perfect partner. For example, with the best tube preamps you will be able to enhance the sonic peculiarities, giving an extraordinary ability to drive the speakers without introducing any harshness in the sound or listening fatigue, often present in solid state amplifiers.

**PRODUCT SPECIFICATIONS**

<b>Brand</b>	Norma Audio
<b>Connections</b>	1 RCA, 1 XLR Balanced
<b>Input Impedance</b>	47Kohm (not sel. Input) / 33Kohm (sel. Input)
<b>Outputs Voltage</b>	1 Binding Post couple, 4mm Banana and forks
<b>Frequency Response</b>	0 Hz - 2.0 MHz (-3dB, not filtered)
<b>Output Power</b>	150W RMS / 80hm - 280W RMS / 4 Ohm (per channel)
<b>Gain, Sensitivity</b>	28.5 dB, 1.30 V rms / 150 W - 8 Ohm
<b>Configuration</b>	Dual Mono
<b>Configuration</b>	Solid state
<b>Power devices</b>	MosFet, 4 couple each channel
<b>Available output current</b>	48 A continuous, 200 A peak (each channel)
<b>Capacity of filter</b>	72.000 Uf, 12 capacity for each channel
<b>Electric Transformers</b>	2 toroidal special audio use, 400 VA each channel
<b>Supply</b>	230 V AC / 50 Hz (100V AC or 115 VAC / 50-60Hz in some countries)
<b>Dimensions (HxWxD)</b>	110x430x365mm (excluding footers and rear connections)
<b>Weight</b>	25 Kg
<b>Notes</b>	Stereophonic final amplifier
